### 3 visions for Grand Central's plaza unveiled

The city received three proposals for the possible rezoning of the area around Grand Central Terminal, giving it a dramatic redesign that could include a moving halo high above the street.

The plans, from three respected firms, were un-

veiled Thursday at the Municipal Art Society's Summit for New York City. Here is what they're proposing:

**Skidmore, Owings and Merrill:** A sky-high panoramic ring suspended between two towers that would move up and down.

**Foster + Partners:** Numerous smaller changes, including a pedestrian plaza and easing access to the terminal.

**WXY architecture and urban design:** A High Line-esque walkway with a see-through bottom and seasonal foliage. (AMNY)
